

My name is Therese Sværen, and I am currently studying Front-End Development at Noroff. I am a motivated and curious developer who enjoys building clean, responsive and user-friendly websites. I am passionate about continuous learning and excited to grow as I develop my skills further.

During my studies, I have gained a strong foundation in HTML, CSS and JavaScript, and I am now moving into more advanced JavaScript concepts in the beginning of next year. I work regularly with tools such as Git, Visual Studio Code and Figma, and I apply them throughout my projects. Some of the work in my portfolio reflects this progress—from early design-focused assignments to more functional and interactive JavaScript projects.

Outside of my studies, I enjoy working on creative side projects using **Canva**, where I experiment with design, layout and visual communication. I also support my mother's business by creating simple campaign materials and managing social media content.

My background includes customer-facing roles where I developed strong communication, problem-solving skills and the ability to work both independently and in a team. I bring reliability, structure and a positive attitude into every task, and I am motivated by the opportunity to contribute while continuing to learn.

I am currently seeking opportunities where I can develop professionally, collaborate with experienced developers and contribute to meaningful digital solutions. I am eager to apply my growing skill set, expand my knowledge and take on new challenges within front-end development.

Thank you for taking the time to review my portfolio. I look forward to potential opportunities and to connecting with teams who value creativity, learning and quality user experiences.

**Kind regards,**

**Therese Sværen**
